About DHRISHTI

Project DHRISHTI is a nationwide digital movement aimed at strengthening inclusive education and rehabilitation support for Children with Special Needs (CWSN). It ensures that, at every administrative and implementation level, accurate, real-time details of every CWSN are identified, monitored, and addressed, leaving no child unseen or unsupported.

DHRISHTI follows a structured and transparent reporting framework, flowing seamlessly from:

- State level
- District level
- Mandal / Block level
- School and teacher level
- Up to each individual CWSN

The core purpose of DHRISHTI is to monitor all CWSN nationwide. By capturing need based, real-time data, the initiative enables timely identification, continuous monitoring, and appropriate support; including aids and devices—ensuring that every genuine need of every child is recognized and addressed effectively.

The DHRISHTI project was first flagged off in Andhra Pradesh, and active discussions for its adoption across multiple states support scalable, pan-India implementation.

About XceptionalLEARNING

XceptionalLEARNING is a pioneer in integrating technology with rehabilitation and inclusive education. Our solutions are driven by evidence-based research, strengthened through four years of research-backed innovation, and refined over a total of 5+ years of hands-on field experience in inclusive and rehabilitation settings. XceptionalLEARNING technology has been endorsed by the Rehabilitation Council of India (RCI) as a reference in the special education curriculum for technology-enabled practices in rehabilitation training.

Why XceptionalLEARNING?

- Developed by experienced professionals from Special Education, Speech Therapy, Occupational Therapy, Behavioural Therapy, Physiotherapy, Social Work and Clinical Psychology.

- Evidence-based research paper presentations, multiple invited talks at national and international conferences, knowledge-sharing initiatives across institutions and universities, continuous panel discussions with advisory professionals, and seminars and workshops conducted across India for rehabilitation professionals to facilitate insight sharing and meaningful discussions.

- Monitoring CWSN: Driving quality service delivery and optimized use of government schemes for measurable economic impact.

- Continuity of education and rehabilitation: Seamless case history management, assessments, evaluations, goal setting with target dates, secure custom digital activities, and home-based learning support-even during absenteeism.

- Parental / Caretaker engagement through feedback systems, attendance tracking, home-visit scheduling, and education to promote social inclusion, vocational readiness, and independent living.

1 XceptionalLEARNING provide structured training to rehabilitation professionals, administrators, and stakeholders

2 XceptionalLEARNING is enabled through mobile and other devices to facilitate easy access to solutions

Helps track:

Attendance   Evaluations   Daily activities

Parental Involvement and Progress Reports

Key Highlights of DHRISHTI

Smart Digital Monitoring System

1 Real-time tracking of CWSN activities

2 Easy documentation of case history and intervention plans

3 Structured goal setting and outcome monitoring

4 Seamless mobile and web access

5 HM, Block/Mandal, District, and State-level Monitoring System for all CWSN

6 Secure and organised data management

Digital Content Creation & Library

- Customisable digital content based on individual learner needs
- Access to 1000+ pre-prepared digital content library and options to add outside contents
- Option to create content through Content Studio
- Supports IEP-based planning and intervention
- Supports academic and vocational training content

Digital Activity Book – VergeTAB (Optional Device for CWSN)

Controlled learning device with secure screen time

Works seamlessly with the DHRISHTI platform

Continuity of learning in the classroom and at home

Enables parent engagement and feedback system

Therapist-led and child friendly interface

VergeTAB Interconnect a multi-rehab approach

VERGE-TAB
Therapy for a Better life

Streamlining Special Education Services

Project DHRISHTI bridges the gap in Rehabilitation

- Parents / Caretaker can understand their child's activity and progress
- Encourages transparency among stakeholders, from the state level to the child level
- Builds consistency in home-based training and intervention settings
- Strengthens trust in rehabilitation professionals throughout the child's development journey

Project Recognition & Capacity Building

These milestones reflect the scale, credibility, and impact of Project DHRISHTI in advancing inclusive education through technology.
